

OVERVIEW

Motivated Computer Science student specializing in Artificial Intelligence and Machine Learning with hands-on experience in building real-world, data-driven systems. Skilled in ML, NLP, and LLM-based solutions for enterprise use cases including fraud detection, document intelligence, and multilingual AI systems. Passionate about solving problems in banking, security, and large-scale systems.

EXPERIENCE

AI Intern – Summer of AI Internship | ChaturGpt

Hybrid

VISWAM.AI (Swecha / ViswamAI)

Jun 2025 – Jul 2025

- Developed AI solutions for real-world problem statements with a focus on practical and scalable impact.
- Designed and implemented LLM-based applications, including a multilingual PDF analysis chatbot (ChaturGPT).
- Worked on data collection, preprocessing, and training workflows for a Telugu language large language model.
- Gained hands-on experience in prompt tuning, experimentation, evaluation, and open-source collaboration.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

2022–2026

DRK Institute Of Science And Technology, Hyderabad

CGPA: 7.83

PROJECTS

AI-Powered Transaction Fraud Detection System | GitHub

Nov 2025

- Designed and developed an end-to-end real-time fraud detection system using ML and graph-based intelligence.
- Implemented a hybrid pipeline using Isolation Forest, XGBoost, and Graph Neural Networks for risk analysis.
- Integrated explainable AI (SHAP), automated risk scoring, and PDF-based SAR report generation.
- Implemented concept drift detection and automated model retraining for long-term reliability.

Smart Cart Predictor (Amazon Hackathon) | GitHub

Oct 2025

- Built an ensemble-based ML system for predicting product prices and shopping behavior.
- Implemented LightGBM, Ridge Regression, and Random Forest to minimize SMAPE.
- Applied TF-IDF and Sentence Transformers for product description feature extraction.
- Evaluated models using cross-validation and performance-based optimization techniques.

AI-Based Network Intrusion Detection System (NIDS) | GitHub

Mar 2025

- Developed an ML-based intrusion detection system using the NSL-KDD dataset.
- Performed data preprocessing and feature engineering for network traffic analysis.
- Implemented Random Forest, SVM, and Deep Neural Networks for attack classification.
- Evaluated model performance across binary and multiclass intrusion scenarios.

TECHNICAL SKILLS AND INTERESTS

Languages: Python, C, Java, JavaScript

Frameworks and Libraries: Pandas, Scikit-learn, Numpy, Matplotlib, LightGBM, React.js

Tools and Platforms: Git, GitHub, Jupyter Notebook, VSCode, Linux

Cloud/Databases: MySQL

Coursework: Data Structures Algorithms, DBMS, Operating Systems, OOPs, Computer Networks

Areas of Interest: Artificial Intelligence, Machine Learning, Generative AI, Agentic AI, Cloud Systems

CERTIFICATIONS

- Oracle Cloud Data Science Certified Professional (2025)
- Oracle Cloud Generative AI Certified Professional (2025)
- Oracle AI Foundations Associate (2025)

EXTRA-CURRICULAR ACTIVITIES

- National Hackathon – Zignasa 24-Hour Hackathon (2025)** – Built a collaborative tech solution using the MERN Stack under real-time competitive constraints.
- Deloitte Technology STEM Virtual Experience Program (2025)** – Simulated consulting tasks involving AI strategy, data-driven analysis, and cloud implementation.
